

## **IFRA issues 43<sup>rd</sup> Amendment to Safety Standards**

### **The list of “other materials” does not exist anymore**

For the sake of easier identification of the Prohibited individual materials, individual Standards have been developed and are made of this 43rd Amendment to the IFRA Code of Practice.

This is just a change of the format of the Standards, not of their status. As a consequence the list of “Other materials” is disbanded.
